

Competition Regulations v3.1

League of Tiny Robots — Division One

Scope: These regulations govern all League-sanctioned fixtures, including pre-match calibration windows, pitch boundary verification, and post-match accountability for loose components.

Robot Class: Maximum height 40mm. Maximum width 55mm. Robots must be independently stable when stationary and must not emit sustained hostile tones.

Power: Charging during play is prohibited. Hot-swapping power units is permitted only during authorised stoppages and must be performed with neutral facial expressions.

Conduct: Dissent includes intentional buzzing directed at officials, spectators, or rival robots. Repeat offences may result in docking of points and/or temporary deactivation.

Environmental Interference: Matches may be suspended due to pets, vacuums, spills, or acts of gravity. The referee is empowered to declare a 'lint event'.

Compliance: Ignorance of the rules does not exempt compliance.
